The 50 most significant principles and styles in architecture, each explained in half a minute. The bestselling 30-Second series offers a new approach to learning about those subjects you feel you should really understand. Every title takes a popular topic and dissects it into the 50 most significant ideas at its heart. Each idea, no matter how complex, is explained using a mere two pages, 300 words, and one picture: all easily digested in only half a minute. 30-Second Architecture presents you with the foundations of architectural knowledge. Expert authors are challenged to define and describe both the principles upon which architects depend, and the styles with which they put those principles into practice. So, if you want to know your arch from your elevation, and your Baroque from your Brutalism, or you wish to top off your next dinner party with a stirring speech on how form follows function, this is the quickest way to build your argument.

New York never sleeps, they say, and 30-Second New York offers up an energetic tour of the city, looking at its founding fathers (and mothers), at key events in its history, and at the buildings and people that make up its unique character, taking in all of the Five Boroughs, not just Manhattan. Find out who gave the city Central Park and the Empire State Building, learn what it was like to arrive off the boat at Ellis Island, relive the glory days of Coney Island, and admire the way New York has presented itself to the world culturally, in the art, literature, and music of those who love it. It's an absorbing virtual visit to the liveliest city on Earth.

Who invented photography first, Fox Talbot or Louis Daguerre? Who got the patent? Who made the most money? Who are the greatest photographers and what have their contributions been? This book takes the 50 most important aspects of photography - both the major styles and the key technical aspects that make them possible - and explains each in two pages, 300 words and one picture. The book also includes six profiles of the greatest names in the history of photography and shares their contributions. Whether you pick it up for 30-seconds at a time or read it from cover-to-cover, this book is guaranteed to have you thinking about your own and other people's photography in a whole new way.

The 50 most important structures and systems in the human body, each explained in half a minute. The bestselling 30-Second series offers a new approach to learning about those subjects you feel you should really understand. Every title takes a popular topic and dissects it into the 50 most significant ideas at its heart. Each idea, no matter how complex, is explained using a mere two pages, 300 words, and one picture: all easily digested in only half a minute. 30-Second Anatomy offers you an instant diagnosis of how your body works. Whether youre a medical student, an artist, a body worker, or simply want to know what your doctor is talking about when he mentions your humerus, this is the quickest way to get under your own skin. Dissecting the workings of everything from your heart to your brain into 30-second summaries, this is the quickest way to understand the structures and systems that are you. Supported by biographies of the pioneers in anatomy studies, its the book that would have kept Burke and Hare home at night.

You know that Rome wasnt built in a day, but just how did a cluster of small hilltop villages expand to become one of the greatest empires in history? Why did Romulus kill his brother Remus? How was a legion organized? Did people really speak Latin? What entertainment could you see at the Colosseum? And what was daily life like for a Roman citizen? This book takes a novel approach to answering all these questions and more. 30-Second Ancient Rome presents a unique insight into one of the most brilliantly governed societies, where military might and expansive empire paved the way for technological advances that helped shape our modern existence. From aqueducts to sewers, from mosaics to medical diagnoses, this is the straightest road toward understanding the 50 key innovations and ideas that developed and defined one of the worlds great civilizations.

In the West, the story of Ancient China is less familiar to us than that of Ancient Egypt or Rome, but it is no less absorbing, and its rollicall of achievements is easily as impressive. 30-Second Ancient China unlocks the secrets of its Bronze Age glories and offers summaries of everything from the lost cities of the Zhou kings and the elaborate oracle-bone rituals that were practiced at their courts to the exquisite bronze vessels that gave the age its name, and the birth of Confucianism. Add topics dealing with everyday life in Ancient China, and succinct biographies of some powerful figuresfrom Wu Ding, king of the Shang, to Sun Tzu, author of The Art of War, the first ever treatise on military strategyand 30-Second Ancient China becomes the perfect introduction to one of the great ancient civilizations.

Are you an art-movie buff or a blockbuster enthusiast? Can you reel off a list of New Wave masterpieces, or are you more interested in classic Westerns? Most of us love the movies in one form or another, but very few of us have the all-round knowledge we'd like. 30-Second Cinema offers an immersion course, served up in neat, entertaining shorts. These 50 topics deal with cinema's beginnings, with its growth as an industry, with key stars and producers, with global movements--from German Expressionism to New Hollywood--and with the movies as a business. By the time you've worked your way through, you'll be able to identify the work of George Melies, define auteur theory or mumblecore in a couple of pithy phrases, and you'll have broadened your knowledge of global cinema to embrace not only Bollywood but Nollywood, too. All in the time it takes to watch a couple of trailers.

Chemistry is the science of matter. This book brings boils it down to its essential elements - in just 30 seconds.

Stock-market crashes show how the world of high finance can negatively impact our daily life, but smart money reveals a two-way street where those savvy to the science of finance can take their personal wealth up a gear. What is a hedge fund? How best to understand private equity? What are the principles of investment? 30 Second Money balances key features of personal finance with those of the financial markets and economic concepts, explaining how mass monetary systems relate to one's own money management choices. From basic concepts like risk and return to types of borrowing, investment, and risk management, everything is explained without jargon or complexity. This is the handbook that gives the reader an edge in any business conversation.
