This book constitutes the thoroughly refereed post-proceedings of the 7th Annual International Workshop on Selected Areas in Cryptography, SAC 2000, held in Waterloo, Ontario, Canada, in August 2000. The 24 revised full papers presented were selected from 41 submissions and have gone through two rounds of reviewing and revision. The papers are organized in topical sections on cryptanalysis, block ciphers: new designs, elliptic curves and efficient implementations, security protocols and applications, block ciphers and hash functions, Boolean functions and stream ciphers, and public key systems.

The idea that personal cultivation leads to social and material well-being became widespread in late Tokugawa Japan (1600–1868). Practical Pursuits explores theories of personal development that were diffused in the early nineteenth century by a network of religious groups in the Edo (Tokyo) area, and explains how, after the Meiji Restoration of 1868, the leading members of these communities went on to create ideological coalitions inspired by the pursuit of a modern form of cultivation. Variously engaged in divination, Shinto purification rituals, and Zen practice, these individuals ultimately used informal political associations to promote the Confucian-style assumption that personal improvement is the basis for national prosperity. This wide-ranging yet painstakingly researched study represents a new direction in historical analysis. Where previous scholarship has used large conceptual units like Confucianism and Buddhism as its main actors and has emphasized the discontinuities in Edo and Meiji religious life, Sawada addresses the history of religion in nineteenth-century Japan at the level of individuals and small groups. She employs personal cultivation as an interpretive system, crossing familiar boundaries to consider complex linguistic, philosophical, and social interconnections.

Writing Pregnancy in Low-Fertility Japan is a wide-ranging account of how women writers have made sense (and nonsense) of pregnancy in postwar Japan. While earlier authors such as Yosano Akiko had addressed the pain and emotional complexities of childbearing in their poetry and prose, the topic quickly moved into the literary shadows when motherhood became enshrined as a duty to state and sovereign in the 1930s and '40s. This reproductive imperative endured after World War II, spurred by a need to create a new generation of citizens and consumers for a new, peacetime nation. It was only in the 1960s, in the context of a flowering of feminist thought and activism, that more critical and nuanced appraisals of pregnancy and motherhood began to appear. In her fascinating study, Amanda C. Seaman analyzes the literary manifestations of this new critical approach, in the process introducing readers to a body of work notable for the wide range of genres employed by its authors (including horror and fantasy, short stories, novels, memoir, and manga), the many political, personal, and social concerns informing it, and the diverse creative approaches contained therein. This “pregnancy literature,” Seaman argues, serves as an important yet rarely considered forum for exploring and debating not only the particular experiences of the pregnant mother-to-be, but the broader concerns of Japanese women about their bodies, their families, their life choices, and the meaning of motherhood for individuals and for Japanese society. It will be of interest to scholars of modern Japanese literature and women's history, as well as those concerned with gender studies, feminism, and popular culture in Japan and beyond.
