Red Hope (Book 1) was a very interesting and gripping science fiction book. Blue Hope (Book 2) was a huge improvement over Book 1, and keeps the reader on the edge of their seat as the characters move from challenge to challenge, overcoming a wide range of difficulties.

Blue Hope (Red Hope, #2) by John Dreese - Goodreads

Wher Red Hope was fairly tedious and presented implausible science and procedureds, Blue Hope was instantly engaging and interesting. The storyline is smooth and builds itself, one step after another. There is tragedy and heartache caused by human frailities and bad decisions, yet the human spirit triumphs in the end.

Red Hope: (Book 1) Great story with believable characters. Must read the follow-up. This is the first book I have read by John Dreese. I bought it for a bargain price of 99p. It was worth every penny and more. I love this type of story, believable and down to earth (excuse the pun). A page-turner for me definitely. Roll on book 2.

When his mother became President, Alex Claremont-Diaz was promptly cast as the American equivalent of a young royal. Handsome, charismatic, genius—his image is pure millennial-marketing gold for the White House. There's only one problem: Alex has a beef with the actual prince, Henry, across the pond. And when the tabloids get hold of a photo involving an Alex-Henry altercation, U.S./British relations take a turn for the worse. Heads of family, state, and other handlers devise a plan for damage control: staging a truce between the two rivals. What at first begins as a fake, Instagramable friendship grows deeper, and more dangerous, than either Alex or Henry could have imagined. Soon Alex finds himself hurtling into a secret romance with a surprisingly unstuffy Henry that could derail the campaign and upend two nations and begs the question: Can love save the world after all?
