Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. Science Teaching Reconsidered provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods—and the wonder—of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

Cultivate a love for science by providing standards-based practice that captures children’s attention. Spectrum Science for grade 8 provides interesting informational text and fascinating facts about the nature of light, the detection of distant planets, and internal combustion engines. --When children develop a solid understanding of science, they’re preparing for success. Spectrum Science for grades 3-8 improves scientific literacy and inquiry skills through an exciting exploration of natural, earth, life, and applied sciences. With the help of this best-selling series, your young scientist can discover and appreciate the extraordinary world that surrounds them!

Spectrum Science is sure to captivate students’ interest with a variety of fascinating science information! The lessons, perfect for students in grade 5, strengthen science skills by focusing on electromagnetism, diversity and adaptation, the structure of the earth, resource conservation, and more! Each book features easy-to-understand directions, full-color illustrations, photos, and lively passages. It is aligned to national and state standards, and also includes a complete answer key. Today, more than ever, students need to be equipped with the essential skills they need for school achievement and for success on proficiency tests. The Spectrum series has been designed to prepare students with these skills and to enhance student achievement. Developed by experts in the field of education, each title in the Spectrum workbook series offers grade-appropriate instruction and reinforcement in an effective sequence for learning success. Perfect for use at home or in school, and a favorite of parents, homeschoolers, and teachers worldwide, Spectrum is the learning partner students need for complete achievement.

Cultivate a love for science by providing standards-based practice that captures children’s attention. Spectrum Science for grade 5 provides interesting informational text and fascinating facts about galaxies, subatomic particles, identical twins, and the first airplane. --When children develop a solid understanding of science, they’re preparing for success. Spectrum Science for grades 3-8 improves scientific literacy and inquiry skills through an exciting exploration of natural, earth, life, and applied sciences. With the help of this best-selling series, your young scientist can discover and appreciate the extraordinary world that surrounds them!

Homework Helpers: Earth Science covers all of the topics typically included in a high school or undergraduate course, including: How to understand “the language of rocks.” The events that we see in the sky and how they affect us. Earthquakes and what they can tell us about the inside workings of our world. How to understand the weather and what the weatherman is saying. Homework Helpers: Earth Science is loaded with practical examples using everyday experiences. Every topic includes a number of simple tricks to make even the toughest ideas understandable and memorable. Each chapter ends with practice questions and explanations of answers. As a reference tool Homework Helpers: Earth Science can be used as a preview of tomorrow’s class or a reinforcement of today’s. It will leave students with a firm grasp of the material and the confidence that will inspire a deeper understanding.

Connect students in grades 3-5 with science using Science Vocabulary Building. This 80-page book reinforces commonly used science words, builds science vocabulary, and increases students' readability levels. This comprehensive classroom supplement includes alphabetized word lists that provide pronunciations, syllabifications, definitions, and context sentences for high-utility science words. Activities allow for differentiated instruction and can be used as warm-ups, homework assignments, and extra practice. The book supports National Science Education Standards.

This book is a collection of Home School Brews bestselling science series. It covers grades 1 to 6. Each book may also be purchased separately.

This book is a collection of Home School Brews bestselling social science series. It covers grades 1 to 6. Each book may also be purchased separately.

A study guide for the HESI A2 science nursing school test that calendarizes a study plan for test-takers depending on how much time they have left before taking the test

This workbook, with 50 science experiments and 100 quiz questions, covers the following topics: Scientific Investigation, Energy and Matter, Sound, Living Things, The Solar System, Rocks and Minerals, The Food Chain, Ecosystems, Erosion, Volcano’s and Earthquakes, and Earth Science If you are homeschooling (or if you are just trying to get extra practice for your child), then you already know that science workbooks and curriculum can be expensive. HomeSchool Brew is trying to change that! We have teamed with teachers and parents to create books for prices parents can afford. We believe education shouldn’t be expensive. The problem portion of the book may also be purchased individually in “Fourth Grade Science Experiments.”
