This volume of Eurasian Studies in Business and Economics focuses on latest results from entrepreneurship and SME research, Human Resources, along with a focus on the Tourism industry. The first part deals with topics ranging from entrepreneurial intentions, social entrepreneurship and technological entrepreneurship to EU policies such as the 7th Framework program. Bridging the themes, the second part on Human Resources and General Management deals with human capital issues, labor force education, employer branding and aligning HR practices to knowledge management outcomes. The third part in particular concentrates on the tourism industry in exploring innovative marketing strategies, WEB 2.0 Challenges, tourism product innovation, and success in international markets.

Synonyme de sophistication, de haute technologie et de prix élevés, l'innovation cherche aujourd'hui ses ruptures dans des formes de valorisation de l'offre délaissées par la concurrence et l'accès à de nouveaux clients. L'épopée de la Logan constitue un archétype de ces nouvelles trajectoires de l'innovation et dessine de nouvelles frontières pour l'industrie.Pourquoi et comment une entreprise comme Renault s'est elle lancée dans cette aventure ? Comment a-t-elle surmonté les surprises et les obstacles qui l'ont jalonnée pour devenir l'une des success story les plus spectaculaires de ce début du XXIe siècle ? Quelles sont les suites possibles d'un succès qui déstabilise le modèle de développement traditionnel des entreprises industrielles européennes ? Au terme d'une enquête approfondie dans les coulisses de Renault et Dacia, les trois auteurs, économistes et gestionnaires spécialistes de l'industrie automobile, apportent des réponses à ces questions. Ils analysent la réalisation de ce projet, sous l'angle de la conception du produit, du développement industriel et de son déploiement commercial. Au travers d'entretiens exclusifs avec la plupart des acteurs de ce projet, en particulier, les trois dirigeants qui ont joué un rôle clé dans l'histoire du projet Logan, Louis Schweitzer, Jean-Marie Hurtiger et Gérard Detourbet, découvrez les secrets de cette success story. Illustré de nombreux graphiques et de documents inédits, l'ouvrage montre comment la stratégie Logan a émergé et s'est développée dans l'entreprise, comment elle a su percevoir les tendances des marchés émergents, relever des défis de conception jugés impossibles (réaliser une « vraie » voiture rentable à 5000€), construire et déployer des systèmes industriels et commerciaux, dotant l'entreprise d'une dimension internationale inédite jusque-là. Dans le contexte actuel, cet ouvrage apporte, bien au-delà de l'industrie automobile, des réponses à tous ceux qui s'interrogent sur la déstabilisation actuelle des équilibres économiques mondiaux et le rôle qu'il jouent les processus d'innovation des entreprises.

When you're running the streets, loyalty is everything... Gangs rule the streets of the rough Gallowburn Estate in Glasgow, but the deepest rivalry of all is between Jamie Gray and his friends, known as the Blood Brothers, and their enemies, the Lawsons. The two gangs clash frequently, but when a phone containing incriminating evidence disappears after a particularly brutal run-in, the stakes are higher than ever. Jamie's mother Jackie is as hard as nails and is not going to let anyone hurt her boy - even if she has to roll up her sleeves and get stuck in. What she wants more than anything though, is to see Jamie turn his back on the street life. And when he meets spoilt rich-girl Allegra, who has a penchant for shoplifting, Jackie thinks she could be Jamie's way out. But with the Lawsons closing in, and everyone taking sides, there is only one way out for Jamie, and to triumph he must take out his biggest enemy... If you love Martina Cole, Kimberley Chambers, and Jessie Keane, you'll love Heather Atkinson. Discover the bestselling author Heather Atkinson, her crackling plots, unforgettable characters and page-turning pace and you'll never look back... What readers are saying about Heather Atkinson: 'Another brilliant book from Heather...she really is one the best in the business. ' I have read ALL Heather Atkinson's books. They are all fantastic.' 'All Heather's books are action packed and have you on edge.' I stumbled upon Heather's books and I'm so glad I did , characters excellent and storylines are great , I find myself searching the book stores for more of them to read the minute I finish one.'

This book offers a critical analysis of recent developments in the automotive industry of East-Central Europe (ECE). Economists, industry specialists and national governments have considered the rapid development of the automotive industry in ECE in the past twenty years an unqualified success. This rapid growth has been based on large inflows of foreign direct investment (FDI) from Western Europe, North America, Japan and South Korea, and it significantly contributed to GDP growth, created thousands of new jobs, and completely transformed the previously existing automotive industry in the region. This volume offers an analysis that goes beyond uncritical celebratory accounts of this rapid growth. It is based on original, detailed firm-level research conducted by the author in Czechia and Slovakia between 2009 and 2015 that covered assembly firms and the networks of component suppliers. Theoretically and conceptually, the analysis will draw on the global production networks and global value chains perspectives. Drawing on the original empirical data and on additional available information, this volume concentrates on several important questions related to the development of the automotive industry in ECE in the 2000s:⌚ The role of FDI in the rapid development of the automotive industry after 1990 and particularly in the 2000s.⌚ The upgrading of the automotive industry in East-Central Europe through FDI⌚ The position of ECE in the automotive industry research and development (R&D)⌚ The effects of the 2008-2009 economic crisis in the automotive industry of ECE.⌚ The role of state in the rapid development of the automotive industry in ECE in the 1990s and 2000s.⌚ The effects of FDI on domestic firms in the form of linkages between foreign-owned and domestic firms and spillovers from foreign-owned to domestic firms.

Unconventional energy sources have gained and will continue to gain an increasing share of energy systems around the world. Today, hydrogen is recognized as a non-polluting energy carrier because it does not contribute to global warming if it is produced from renewable sources. Hydrogen is already part of today's chemical industry, but as an energy source, its rare advantages can only be obtained with the help of technologies. Currently, the fuel cell is considered the cleanest sustainable energy. With the development of fuel cells, hydrogen-based energy generation becomes a reality. Hydrogen Fuel Cell Technology for Stationary Applications is an essential publication that focuses on the advantages of hydrogen as a primary energy center and addresses its use in the sustainable future of stationary applications. While highlighting a broad range of topics including cost expectations, production methods, and social impact, this publication explores all aspects of the implementation and dissemination of fuel cell technology in the hope of establishing a sustainable marketplace for it. This book is ideally designed for fuel cell manufacturers, architects, electrical engineers, civil engineers, environmental engineers, advocates, manufacturers, mechanics, researchers, academicians, and students.

Solongus is a full-length business novel, focused on the on-going automotive industry in the world. Thus, it is not a period novel on (Turf Fight of Power.⌚ But it is an epitome of warlike competition on a global product that is a horseless carriage ⌚ automobile. Currently, global automakers such as GM, Ford, Toyota, Volks Wagon, BMW, Benz, Renault, Fiat, Hyundai, Tata, Chinese Big Four, and other dark horses, are fiercely competing for the market share in the world to get the popularity from earthlings as if they were Pretenders to the throne in the world. Right here, their class acts in the borderless battlefield are portrayed art of war in the Heroic Age. In the book series, their versatile strategies and skilled tactics are also revealed under the shiny commercial slogans, of course, with their own chariots.

This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.
