"HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Presents a multifaceted model of understanding, which is based on the premise that people can demonstrate understanding in a variety of ways.

Teams that engage in designing, using, and responding to common formative assessments are more knowledgeable about their own standards, more assessment literate, and able to develop more strategies for helping all students learn. In this conversational guide, the authors offer tools, templates, and protocols to incorporate common formative assessments into the practices of a PLC to monitor and enhance student learning

Research confirms that the teacher makes the greatest difference in the learning success of students, so it's important that new teachers get off to a strong start. With help from veteran teacher and mentor Gini Cunningham, inexperienced teachers can better understand and successfully tackle the many daily challenges they will face in the classroom: * Setting up classroom procedures and managing class time * Coordinating standards, curriculum, and textbooks * Developing manageable lesson and unit plans * Handling discipline problems and engaging students in learning * Using effective assessment practices and monitoring student achievement Teaching is a physically and emotionally demanding career, but Cunningham's practical advice and memorable anecdotes will help teachers prepare for and enjoy their work--even on the most difficult days. And administrators can use this accessible guide to support new professionals and avoid early burnout. The New Teacher's Companion is a valuable resource for any teacher who wants the classroom to be a rich and rewarding place for teachers and students alike.
