This case book is the ideal text for Operating Department Practitioners (ODPs), as well as student ODPs and nurses preparing to work in perioperative care. individual patient. This text presents 20 interactive case studies that will support the reader in assimilating a wide range of professional knowledge in order to develop a comprehensive plan of care for patients they encounter. The practical cases:

- Demonstrate how care will vary depending on the patient ' s physiological assessment and their personal, social, cultural and emotional needs
- Will consolidate the reader ' s learning around pathophysiology, pharmacology, assessment skills and clinical skills
- Include common clinical procedures as well as those that are more complex and require a deeper analysis of the evidence in order to improve patient care.
- Use “ Stop and Think ” boxes to encourage readers to reflect on key points within the case study, in order to develop their own knowledge and assist in their CPD

This text will support all learners, at both pre- and post-registration level as they develop their knowledge of perioperative care. Its goal is to help the practitioner deliver excellent and confident care in perioperative practice and in other healthcare settings.

“ Although clearly targeted at the student Operating Department Practitioner, Abbott and Wordsworth have produced a learning resource that any learner in the perioperative environment will find both informative and a useful learning aid. The editors have set out the twenty patient case studies in a sequence that allows the student to work through them as their course and competence progresses, although students can dip into the case studies in any order that supports their current clinical placement. The section introducing perioperative care is essential reading for any perioperative practitioner, with an up-to-date introduction to the latest concepts of teamwork and human factors in patient safety. Coupled with the patient-centred focus of the case studies this provides any reader with an understanding of the changing approach to patient care in

the perioperative environment. ” Bill Kilvington, President, College of Operating Department Practitioners, UK “ I have read this book several times and found that the chapter contents are excellent. This book will be useful for ODPs and theatre nurses, it will enhance their knowledge and skills and may also enhance their abilities to work in operating departments and care well for patients. The book covers preoperative care, intraoperative care and postoperative care which is essential for all practitioners working in operating departments. The content of this book is very informative and will be of great use to both students and qualified practitioners. I find it very impressive and I envisage it to be very useful to all theatre practitioners! ” Paul Wicker, formerly Head of Perioperative Studies, Edge Hill University, UK and Visiting Professor, Nanjing University, China.

Optimizing outcomes for women in labor at the global level requires evidence-based guidance of health workers to improve care through appropriate patient selection and use of effective interventions. In this regard, the World Health Organization (WHO) published recommendations for induction of labor in 2011. The goal of the present guideline is to consolidate the guidance for effective interventions that are needed to reduce the global burden of prolonged labor and its consequences. The primary target audience includes health professionals responsible for developing national and local health protocols and policies, as well as obstetricians, midwives, nurses, general medical practitioners, managers of maternal and child health programs, and public health policy-makers in all settings.

In *Evidence, Politics, and Education Policy*, political scientists Lorraine M. McDonnell and M. Stephen Weatherford provide an original analysis of evidence use in education policymaking to help scholars and advocates shape policy more effectively. The book shows how multiple types of evidence are combined as elected officials and their staffs work with researchers, advocates, policy entrepreneurs, and intermediary organizations to develop, create, and implement education policies. *Evidence, Politics, and Education Policy* offers an in-depth understanding of the political environment in which evidence is solicited and used. Two key case studies inform the book's findings. The primary case—a major, multimethod study—examines the development and early implementation of the Common Core State Standards at the national level and in four states: California, Indiana, Massachusetts, and Tennessee. A comparative case analyzes the evidence used in Congressional hearings over the twenty-year history of the Children's Health Insurance Program. Together, the two cases illustrate the conditions under which different types of evidence are used and, in particular, how federalism, the complexity of the policy problem, and the policy's maturity shape evidence use. McDonnell and Weatherford focus on three leverage points for strengthening the use of research evidence in education policy: integrating research findings with value-based policy ideas; designing policies with incentives for research use built into their rules and organizational structures; and training policy analysts to promote the use of research in policymaking venues.

While attention has been paid to various aspects of music education in China, to date no single publication has systematically addressed the complex interplay of sociopolitical transformations underlying the development of popular music and music education in the multilevel culture of China. Before the implementation of the new curriculum reforms in China at the beginning of the twenty-first century, there was neither Chinese nor Western popular music in textbook materials. Popular culture had long been prohibited in school music education by China ' s strong revolutionary orientation, which feared ' spiritual pollution ' by Western cultures. However, since the early twenty-first century, education reform has attempted to help students deal with experiences in their daily lives and has officially included learning the canon of popular music in the music curriculum. In relation to this topic, this book analyses how social transformation and cultural politics have affected community relations and the transmission of popular music through school music education. Ho presents music and music education as sociopolitical constructions of nationalism and globalization. Moreover, how popular music is received in national and global contexts and how it affects the construction of social and musical meanings in school music education, as well as the reformation of music education in mainland China, is discussed. Based on the perspectives of school music teachers and students, the findings of the empirical studies in this book address the power and potential use of popular music in school music education as a producer and reproducer of cultural politics in the music

The integration of information and communication technologies in education is unavoidable, as an increasing percentage of educators embrace modern technology, others are faced with the decision to reevaluate their own pedagogical practices or become obsolete. To meet the needs of students, one must first define what stipulates a successful K-12 student, the best practices of online classrooms, the warning signs for low-performing students, and how to engage web-based students. *Optimizing K-12 Education through Online and Blended Learning* addresses the models, support, cases, and delivery of K-12 online education. Seeking to further the conversation about the most effective ways to integrate ICT into the classroom, this publication presents theoretical frameworks to support educators and administrators. This book is an essential collection of research for teachers, administrators, students of education, IT professionals, developers, and policy makers.
