This book teaches the fundamentals of CNC machining. Topics include safety, CNC tools, cutting speeds and feeds, coordinate systems, G-codes, 2D, 3D and Turning toolpaths and CNC setups and operation. Emphasis is on using best practices as related to modern CNC and CAD/CAM. This book is particularly well-suited to persons using CNC that do not have a traditional machining background.

This Lab Workbook is designed for use with the CNC Manufacturing Technology textbook. The lab workbook includes review questions that correspond to each chapter in the textbook. Answering these questions as you read the textbook chapter will help you gain a deeper understanding of the key concepts and ideas being explained in the chapter. You will learn the material more effectively through completion of these review questions. In addition to review questions, this lab workbook also includes 80 activities designed to help you develop some of the foundational skills and knowledge needed to become a successful CNC machinist.

Metal Lathe for Home Machinists is a project-based course that provides a complete introduction to the lathe and lathe metalworking. This book takes beginners through all the basic techniques needed to tackle a wide range of machining operations. Advance through a series of practice projects that teach how to use the lathe and develop essential skills through practical application. Contained 12 lathe turning projects to develop confidence and become an accomplished home shop machinist, each project is designed to develop essential lathe skills that the reader will use again and again. All of the projects are extensively illustrated and full working drawings accompany the text. The book advances from basic projects to higher levels of difficulty as the course progresses, from a simple surface gauge to a milling cutter chuck where precision and concentricity is vital. After completing this course, the reader will have amassed a wealth of practical skills and a range of useful workshop tools and equipment, while lathe owners with more advanced skills will discover new techniques.

More than 100,000 entrepreneurs rely on this book for detailed, step-by-step instructions on building successful, scalable, profitable startups. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the "Lean Startup" movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you: 

- Avoid the 9 deadly sins that destroy startups' chances for success
- Use the Customer Development method to bring your business idea to life
- Incorporate the Business Model Canvas as the organizing principle for startup hypotheses
- Identify your customers and determine how to "get, keep and grow" customers profitably
- Compute how you'll drive your startup to repeatable, scalable profits.

The Startup Owner's Manual was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. The cover, design, and content are the same as the prior release and should not be considered a new or updated product.

Established in 1911, The Rotarian is the official magazine of Rotary International and is circulated worldwide. Each issue contains feature articles, columns, and departments about, or of interest to, Rotarians. Seventeen Nobel Prize winners and 19 Pulitzer Prize winners 

- from Mahatma Ghandi to Kurt Vonnegut Jr.
- have written for the magazine.
