“ ringing salvo in the sex-difference wars ” (The New York Times Book Review), Pinker examines how fundamental sex differences play out over the life span. By comparing fragile boys who succeed later in life with high-achieving women who opt out or plateau in their careers, Pinker turns several assumptions upside down: that women and men are biologically equivalent, that intelligence is all it takes to succeed, and that women are just versions of men, with identical interests and goals. In lively prose, Pinker guides readers through the latest findings in neuro- science and economics while addressing these questions: Are males the more fragile sex? Which sex is the happiest at work? Why do some

male college dropouts earn more than the bright girls who sat beside them in third grade? The answers to these questions are the opposite of what we expect. A provocative and illuminating examination of how and why learning and behavioral gaps in the nursery are reversed in the boardroom, this fascinating book reveals how sex differences influence career choices and ambition. Through the stories of real men and women, science, and examples from popular culture, Susan Pinker takes a new look at the differences between women and men.

This masterpiece of social science explores the evolution of women's economic reliance on men. Gilman discusses the limitations in intellectual and emotional development inherent in this convention and its injurious effects on both sexes. A classic of feminist theory, this work still resonates a century after its initial publication.
