How do we define thinking? Is it simply memory, perception and motor activity or perhaps something more complex such as reasoning and decision making? This book argues that thinking is an intricate mix of all these things and a very specific coordination of cognitive resources. Divided into three key sections, there are chapters on the organization of human thought, general reasoning and thinking and behavioural outcomes of thinking.

~~Thinking and Reasoning: An Introduction to the Psychology—~~

The psychology of reasoning is the study of how people reason, often broadly defined as the process of drawing conclusions to inform how people solve problems and make decisions. It overlaps with psychology, philosophy, linguistics, cognitive science, artificial intelligence, logic, and probability theory. Psychological experiments on how humans and other animals reason have been carried out for over 100 years. An enduring question is whether or not people have the capacity to be rational. Curre

Thinking and Reasoning: An Introduction to the Psychology of Reason, Judgment and Decision Making eBook: Manktelow, Ken, Galbraith, Niall: Amazon.co.uk: Kindle Store

~~Thinking and Reasoning: An Introduction to the Psychology—~~

Abstract It is argued that reasoning in the real world supports decision making and is aimed at the achievement of goals. A distinction is developed between two notions of rationality: rationality which is reasoning in such a way as to achieve one's goals--within cognitive constraints--and rationality which is reasoning by a process of logic.

~~Reasoning, decision-making and rationality~~

From the interdisciplinary perspective of new research in cognitive psychology, linguistics, philosophy, and neuroscience, this book explores thinking, reasoning, and decision making in autism. The new cognitive approaches challenge some of the existing assumptions of the nature of thought in autism, including presumed areas of impairments.

~~Thinking, Reasoning, and Decision-Making in Autism—1st—~~

The main areas covered are probability judgement, deductive and inductive reasoning, decision making, hypothetical thinking and rationality. In each case, the material is almost entirely new, with topics such as the new paradigm in reasoning research, causal reasoning and counterfactual thinking appearing for the first time.
