SBR Product Information Super Barrier Rectifier: An Evolution
In Power Rectifier Technology. A central component to a

power circuit, or any type of circuit where a signal needs to be
conditioned is a rectifying diode. Traditionally diodes from one

of two families are used in these applications: the pn-junction
diode and the Schottky Barrier diode. These technologies are

well-established in circuit design and form the basis of most
IC fabrication techniques.

SBR Product Information - Diodes Incorporated

Super Barrier Rectifier (SBR) is a proprietary and patented
Diodes Inc technology that utilizes a MOS manufacturing
process (traditional Schottky uses a bipolar process) to create
a superior two terminal device that has a lower forward
voltage (VF) than comparable Schottky diodes while
possessing the thermally stable characteristics of PN diodes.
