inherent in the choosing of award winners in each field, scandals, corruption, and the problems stemming from a refusal to change with modern times.

Founded by the brilliant, misanthropic inventor of dynamite, the Nobel Prize has for a hundred years claimed to identify the summit of human achievement. But what exactly is the Nobel Institution? How does it choose its winners? Has it ever made a mistake? And why does the prize hold such importance? With deft insight and sparkling wit, Burton Feldman considers these questions while taking us on a fascinating tour of every aspect of Alfred Nobel's grand legacy: its founder, its aura, its fields of award—literature, physics, chemistry, medicine, peace, and economics—and its laureates' personalities and rivalries, as well as its biases, controversies, and blunders. The first

From the first woman Nobel Peace Prize recipient, Bertha von Suttner (1905), to the latest and youngest female Nobel laureate, Malala Yousafzai (2014), this book in its second edition provides a detailed look at the lives and accomplishments of each of these sixteen Prize winners. They did not expect recognition or fame for their work--economist Emily Greene Balch (1946) was surprised to learn that anyone knew about her. But they did not work in isolation: all met with discouragement, derision, threats or--in Yousafzai's case--attempted murder and exile. A history of the Prize and a biographical sketch of Alfred Nobel are included.
