Chapter 7 Acids Bases And Solutions Cross Word Puzzle

Solution: While diluting an acid, it is recommended that the acid should be added to water and not water to the acid because if water is added to concentrated acid, it release huge amount of heat which may result in explosion and can cause acid burns o face, clothes and body parts. Hence it is safe to add acid to water but not water to acid.

NCERT Solutions Class 10 Science Chapter 2 Acid Bases and ...

Ans .The reaction between an acid and a base is known as neutralisation. Salt and water are produced in this process with the evolution of heat. Antacids like milk of magnesia (magnesium hydroxide), baking soda, etc. which contain a base are used for reducing acidity in stomach when excessive acid released by glands.
