You can read these two new articles here: Managing large documentation projects; Managing small documentation requests; I added these two processes into a new section in my API documentation course called Managing developer portals.In that section, I plan to add other info here about managing developer portals, including managing the SDK release process, the documentation review process, and more.

Processes for managing large documentation projects and ...
Hands up if you manage multiple projects? Yes, I thought so! A while back in my career I had the luxury of managing a big project and that was all I did. I use the term "luxury" lightly because it was hard work, but at least my brain was always in the same space each day. These days, like many of you, I manage multiple projects.

To create a consistent project management process, set a few team-wide conventions. For example, for large projects you might require project leads to create a brief before outlining the project plan. Additionally, make templates for projects your team does often.

10 Strategies For Successfully Managing Multiple Projects ...
For large projects, the ability to adapt is the difference between success and failure. The leadership team should analyze the situation, correctly answering questions like: Is this really a program? Is it a series of modestly scoped, small projects? Must the project or program deliver a product line, a system of systems?
